PROFILE

Computer Engineering graduate from ISCTE-IUL, completed alongside full-time employment. Grounding in C, operating systems, computer architecture and concurrent programming, with project work across object-oriented, functional and full-stack development. Nine years in inventory and operations, in a role where data accuracy has direct commercial consequences. Seeking a first junior software engineering position opportunity.

TECHNICAL SKILLS

Programming (project experience): C, Java, Python, Scala, JavaScript, PHP
Programming (exposure): C++, Bash, Lua, Pawn, Batch
Systems & tooling: Linux, Git, Docker, Windows API
Databases: MySQL / MariaDB, MongoDB
Frameworks & libraries: React.js, Reactstrap, Django, JavaFX, Swing
Languages: Portuguese — native · English — advanced · French — basic

EDUCATION AND CERTIFICATES

B.Sc. in Computer Engineering, ISCTE-IUL

Sep 2023 – July 2026

Relevant coursework: Operating Systems and Linux, Computer Architectures and Microprocessors, Computer Networking, Concurrent and Distributed Programming, Object-Oriented and Functional Programming.

ProgramISTA 2026, ISCTE-IUL - *May 9, 2026*

Competitor in the 1st edition of the university's competitive programming contest.

ACADEMIC PROJECTS EXPERIENCES

2D Game Development Project (Java, OOP)

Donkey Kong clone built from scratch: tile-based level representation, player movement and collision detection, applying object-oriented principles throughout.

(github.com/tiagomcalves/OOP-final-2024)

Multi-Agent Systems Project (Python, Q-Learning)

Simulator for grid-based environments with two agent implementations — a Q-learning agent and a fixed-policy agent — covering navigation, resource collection and constrained decision-making. (*github.com/tiagomcalves/aa-SMA*)

Functional Programming Project (Scala, JavaFX)

Complete game logic and text interface written in a purely functional style, with a JavaFX GUI layered on top using classes and case classes for state management, keeping the immutable core separate from the event-driven interface. (github.com/tiagomcalves/Projeto_PPM_2024/tree/GUI)

PantryMate — Web Application (Full-Stack)

Web application for household pantry management — food stock tracking, expiry dates, shopping lists — with core functionality implemented across frontend and backend. (github.com/tiagomcalves/pantrymate)

LATEST WORK EXPERIENCES

Inventory & Operations Assistant - *Feb 2017/Current* - Torres Vedras, Lisbon, Portugal

Autoparts store, ACESSÓRIOS SELCAR DE RODRIGUES E CARVALHO, LDA.

- Handling supplier invoices and delivery notes, ensuring accurate stock entry
- Product setup and management in stock and invoicing systems
- Analysis and comparison of similar products
- Keeping product data accurate and up to date to support sales
- Filing and organizing documents

Warehouse Worker - *Sep 2013/January 2017* - Torres Vedras, Lisbon, Portugal

Autoparts store, ACESSÓRIOS SELCAR DE RODRIGUES E CARVALHO, LDA.
